**Ultraform PBT™**  
PRESS BRAKE FORMING ADAPTER

*Expand capabilities and increase revenue:*  
Form sheet metal on your press brake with **Ultraform PBT™**.

ULTRAFORM PBT™

**Ultraform PBT™** combines Mate's proven, top-of-the-line **Ultraform®** thick turret forming system with our all-new universal press brake forming holder. Produce electrical knockouts, louvers, lance and forms, embosses and stencils on your press brake.

The Ultraform PBT universal holder system uses interchangeable plates to mimic the upper and lower turret environments of a thick turret punch press. Precision alignment is achieved with guide pins during installation. These pins are removed during operation to provide fully open area for the workpiece.

The power of Ultraform's unique system is that you can have an array of forming tools and use the same holder, reducing your overall tooling spend. Want to use a different form? Simply swap out the forming assembly. It's not only efficient, it's cost-effective.
